Xuan Zhang is professor in the Department of Rheumatology & Clinical Immunology, Peking Union Medical College (PUMC) Hospital, Beijing, China.

Professor Zhang earned his medical degree from PUMC, then went on to train in internal medicine and rheumatology at PUMC Hospital. From 2001 to 2003, he underwent a post-doctoral research fellowship at the Autoimmune Branch of the National Institute of Arthritis and Musculoskeletal and Skin Diseases, NIH, Bethesda, Maryland, USA. He has taught at his alma mater since 1997, gradually rising in the ranks to his present position, to which he was appointed in 2005.

Author or co-author of over 180 peer-reviewed international and national scientific papers that focused on clinical and basic research of systemic lupus erythematosus, rheumatoid arthritis, autoimmune liver disease, et al, Professor Zhang is a multi-awarded investigator. He sits on the editorial boards of J Clin Rheumatol, W J Gastroenterol, British Med J (Chinese edition), and seven Chinese national academic journals. He currently serves as general secretary of Chinese Rheumatologist & Immunologist Association, and also as a member of steering committee of CRA (Chinese Rheumatology Association) and Scientific committee of APLAR (Asia Pacific League of Associations for Rheumatology).

Selected publications

1. Identify Biomarkers of Neuropsychiatric Lupus by matrix assisted laser desorption / ionization time of flight mass spectrometry combined with weak cation magnetic beads. J Rheumatology. 2010, (epub ahead of print).
2. Are CD4+CD25-Foxp3+ cells in untreated new-onset lupus patients regulatory T

cells? *Arthritis Res Ther* 2009;11(5):R153.

3. Clinical significance of increased CD4+CD25-Foxp3+T cells in patients with new-onset systemic lupus erythematosus *Ann Rheum Dis.* 2008 Jul;67(7):1037-40.
4. Cell-ELISA detection of antineuronal antibodies in central nervous system involvement in systemic lupus erythematosus. *Ann Rheum Dis.*2007;66(4):530-2.
5. Diagnostic value of Single Photon Emission Computed Tomography in severe central nervous system involvement of systemic lupus erythematosus--a case-control study, *Arthritis Rheum.* 2005;53 (6): 845-9.
