## **Opportunities:**

- To really support the FAIS legacy project
- Continue with courses in the African Immunology School
- Help to develop immunology in the FIMSA region, particularly Iran
- To support Faith Ossier for recruiting and training African clinicians by the Else-Kröner-Fresenius funding

## **Challenges:**

- Recruit active colleagues from the regional societies for the Clinical Immunology Committee, also a new chair of the committee
- Help to establish immunology as a subspecialization in more regions than North America and Europe
